

Dr. Daniel Rubin is like no other medical professional I have ever encountered. He took time to know me and understand the underlying causes to my cancer. He provided personalized, compassionate care with a strong commitment to my well-being. He educated and empowered me to take part in my own healing. His mind, body, spirit approach is the reason I am cancer-free today.

At 34, I now have my whole life ahead of me. From the depths of my soul, I thank you, Dr. Rubin.

Diane Paradise
New York

My affiliation with Dr. Daniel Rubin began in 1998 when following a routine mammography and annual screening, two suspicious tumors were found in my left breast. After a lumpectomy biopsy and axillary dissection, both tumors were revealed to be malignant. What followed all of this was a lengthy series of high dose Vitamin C which I was receiving intravenously approximately two to three times a week, along with a regimen of oral supplements to combat any possible remaining cancer cells within my body. Dr. Rubin was a wealth of information to me in the arena of natural medicine, as I had opted out of any conventional chemotherapy or radiation. I was monitored routinely throughout the course of treatment with Dr. Rubin, and my greatly improved health was confirmed via blood screening and mammograms. I am now proud to say that five years later I am still cancer free. Under Dr. Rubin's care, I always felt confident that I would beat the disease that took me by surprise. I would encourage anyone faced with the challenge of cancer to consult with Dr. Rubin who can suggest an array of the many treatment options available today. I will always be grateful for the professional advice and support I received.
